

'BUILD-TO-SPEC' PROGRAM

Through the Heli-One 'Build-to-Spec' Exchange Program, we can customize engine and component exchanges to meet certain condition and price requirements.

For example, with a GE CT58 engine, here are a few parameters we can customize for:

Our team of technicians will work with you to find the best 'Build-to-Spec' solution for your needs. We utilize our parts inventory, exchange pool, in-house testing, in-house engineering, support workshop, and accessory shop to customize an exchange to suit your needs. Whether time or price is your driver - 'Build-to-Spec' will find an exchange solution for you.

BENEFITS:

- Exchanges are a 0 or near-0 downtime solution for engine or component overhaul
- Extensive used, overhauled, lower time remaining part inventory to reduce TAT and cost (over new/replacement)
- Access to in-house Accessory Shop to reduce cost of overhaul
- Access to in-house Support Workshop to reduce cost of rework repair items
- Access to in-house Test Cell for quick testing turnaround
- Access to Engineering expertise to customize repairs and reworks of parts, reducing cost and potentially salvaging parts that could have been deemed BER by OEM
- Technicians and engineers can review records & operations for strategic use of LLPs, accessory installation, and SB updates
- In-house Engine workshop can customize run time to suit needs and reduce cost of repair/overhaul
