Self-Audit / Quality Survey Revision date: 30-Sep-2023

Self-Audit

	Requirement	Yes	No	N/A	
Quality Program					
1.	Is there a documented quality system? If so, where is it documented?				
	Maintenance Policy Manual (MPM): Transport Canada approved AMO 82-00 manual	\boxtimes			
	ISO9001/AS9110 Quality Manual		ш	Ш	
	EASA Supplement / ANAC Supplement / JCAB Supplement				
	Does the Quality Manual (or equivalent) contain policies and procedures for internal quality audits, including issuance and follow-up on audit findings?	\boxtimes			
3.	Are quality findings and corrective action requests issued on internal or external audits retained for at least three years?	\boxtimes			
4.	Is there a documented and effective training program that complies with applicable civil aviation requirements?	\boxtimes			
5.	Is return to service personnel properly trained, certified and authorized for all work performed at the facility?	\boxtimes			
6.	Is there an effective system for ensuring that only authorized personnel signs off an authorized release certificate (e.g. stamps control, roster)?	\boxtimes			
Tec	chnical Data / Technical Records				
7.	Is all necessary technical data (CMM, drawings) available to perform work on all items on the capability list?				
8.	Is work performed only based on approved technical data acceptable to the customer or as specified in the Purchase Order?	\boxtimes			
9.	Do procedures for ensuring technical data used for performing work is current and available to mechanics and inspectors?	\boxtimes			
10.	Is there a procedure for storage of Technical Records	\boxtimes			
Parts Handling					
11.	Is there a documented and effective shelf-life program that applies to all parts subject to time control limitations?	\boxtimes			
12.	Is there a documented and effective system for ensuring all parts are properly identified?	\boxtimes			
13.	Are there effective policies for ensuring the traceability of parts and materials to an approved source?	\boxtimes			
14.	Is there a documented and effective parts segregation program that ensures that non- aircraft and non-serviceable parts are not inter-mixed with serviceable parts?	\boxtimes			
15.	Are parts adequately protected from the environment, dust, contaminants and metal-metal contact through the repair process?	\boxtimes			
16.	Is there a documented and effective program to ensure that parts subject to Electrostatic Discharge protection are properly handled?	\boxtimes			
17.	Is there an adequate Scrapped parts program in place in order to ensure that rejected parts do not return to the aircraft market?	\boxtimes			
	cilities, Equipment and tools				
18.	Is there a documented and effective program for ensuring that all tools subject to periodic calibration are adequately monitored, identified and re-calibrated?	\boxtimes			
19.	Is there a system to ensure that all tools are calibrated using standards traceable to an approved standards organization (e.g. NIST)?	\boxtimes			
20.	Do the facilities provide adequate housing, protection (e.g. clean rooms, environmentally controlled rooms) and working space as required by applicable standards and specifications?	\boxtimes
