

Heli-One Poland Rzeszow, Poland

Strategically located in Poland's aviation valley and near major central European operators, Heli-One Poland is ideally situated to service operators in Africa, Asia, Europe, and the Middle East. Opened in 2014, Heli-One's newest facility is 65,000 sq ft with 70 highly educated and skilled engineers, technicians and managers.

Our Poland facility was designed applying the latest LEAN principles to maximize efficiency. From pop-up floor outlets to a pneumatic parts delivery system, we have invested in the latest technology to create one of the world's most advanced helicopter maintenance facilities.
