

SEARCH AND RESCUE CONFIGURATIONS

Heli-One has a rich history supporting Search and Rescue (SAR) helicopters and crew. Our Design Engineers and technicians work with SAR crews to collaborate on configurations and solutions that are flexible, lightweight, safe, and durable. We provide out-of-the-box and customized solutions that scale for budget and operational flexibility.

MEDICAL EQUIPMENT RACK

Removable medical equipment rack for cabin seats for ad-hock ambulance or SAR missions. The rack is placed in any normal passenger seat and is secured by seatbelt. The rack is fully customizable for vital equipment and crew requirements.

BENEFITS:

- Easy to install and remove
- Can be used in any passenger seat
- Certified and in use by SAR operators
- Medical equipment on rack can be customized for mission needs
- Qualified for crash and manoeuvring loads for AS332
- Adaptable for other aircraft models

SAR CABIN CONFIGURATION

Custom configuration that is modular in format which allows for maximum crew customization and efficiency. The modular medical wall accommodates equipment that can be reconfigured quickly and to the crew's optimal placement. Modification can be installed with a turnaround time of 14 days.

CABIN CONFIGURATION CAN CONTAIN:

- Modular medical equipment wall
- Main stretcher installation with easy sliding and locking mechanism
- 2nd Stretcher installation
- Sea tray for water & fluid collection
- Storage solutions (for trauma bags, additional equipment, etc)

EQUIPMENT RACK CAN CONTAIN:

- Defibrillator
- Oxygen bottles
- Suction Units
- Medical lighting
- Communication equipment
- Medicine storage

To always keep you safe and mission-ready while reducing cost of ownership
